

Seamlessly Connecting *Demand and Supply* in Travel Technology

Bakuun provides seamless, secure, and frictionless connectivity between travel providers (demand) and hotels (supply) through uniquely developed, interdependent products.

About Bakuun

Founded in 2020, Bakuun's proprietary solutions empowers partners to manage operations and process payments more efficiently and cost-effectively.

Aggregate

Channel Manager Aggregator

- One API connection simplifies integration.
- Access 200+ channel managers globally.
- Empowered by a powerful Extranet for seamless property management with enhanced functionality.

Marketplace

B2B Hotel Marketplace

- Eliminates middlemen for direct, profitable bookings.
- Integrated with PayDocker, reducing distribution costs to maximize revenue.
- Real-time rates and availability for seamless transactions.

Content

Hotel Onboarding & Content Creation:

- Proprietary AI streamlines hotel onboarding and content creation.
- Ensures efficient, accurate, and consistent content across platforms.

Integrate

Connectivity Partner API for Channel Managers to seamlessly connect with multiple demand partners without the cost, time, and effort of individual integrations.

Direct IN DEVELOPMENT

Hotel Booking Engine with Cryptocurrency Payment

Capabilities: Supports cryptocurrency payments, offers fully customizable packaging and a direct booking engine.

Store IN DEVELOPMENT

App store currently in its early-stage release, featuring **PayDocker**. More essential apps will be introduced soon.

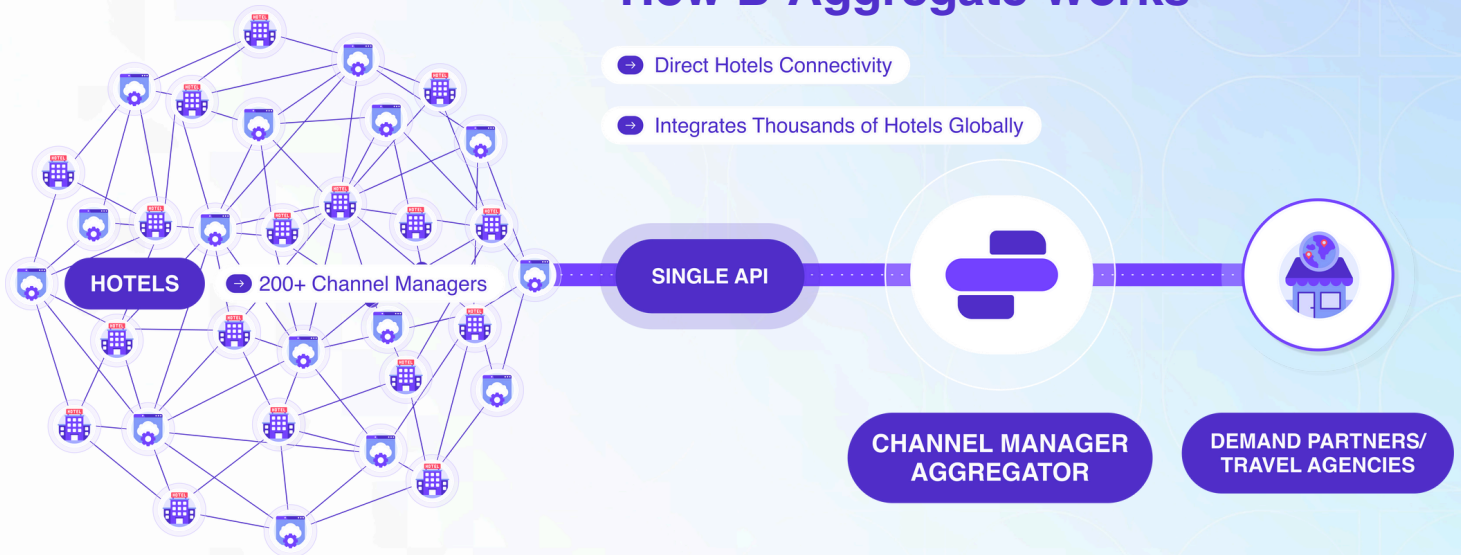

Blockchain-based Payment Platform

- Cut costs by up to 75% with efficient transactions.
- Smart contracts eliminate reconciliation challenges.
- Redefining virtual payments for the travel industry.

B-Aggregate offers seamless access to 200+ channel managers through a single API connection, eliminating integration complexities for travel providers and demand partners. This direct, unified connectivity streamlines hotel distribution, providing efficient access to a diverse network of supply partners and hotel properties. By simplifying integrations, businesses can scale faster, optimize distribution, and reduce operational costs.

How B-Aggregate Works

✓ Simplified Integration

Connect with multiple channel managers and hotels via one API.

✓ Efficient Management

Centralized platform for real-time updates and streamlined operations.

✓ Extensive Reach

200+ channel managers, direct connectivity to thousands of hotels.

✓ Faster Go-to-Market

Quickly expand distribution channels without technical hurdles.

✓ Cost-Effective

Reduce costs by eliminating manual processes and leveraging automation.

✓ Scalable Solutions

Designed for businesses of all sizes to grow effortlessly.

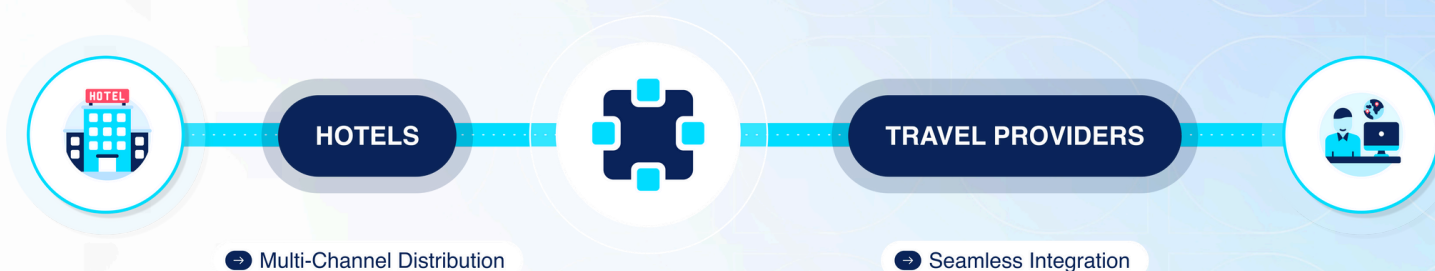

Your Competitive Edge in Hotel Distribution

With B-Aggregate, you gain access to a robust ecosystem designed to simplify operations, enhance connectivity, and drive growth. Whether you're a travel provider looking to streamline integrations or a business seeking scalable solutions, B-Aggregate is your trusted partner in hotel distribution.

B-Marketplace connects hotels and travel providers, creating a unified marketplace that eliminates the potential high cost of distribution and intermediaries. By enabling direct and cost effective transactions, it provides real-time rates and availability for seamless bookings, expanding reach for hotels and travel businesses.

How B-Marketplace Works

✓ Extensive Demand Network for Supply Partners

Connect with a broad ecosystem of OTAs, direct sales platforms, and travel agencies to maximize your bookings and revenue.

✓ Robust Supply Network for Demand Partners

Gain access to an expansive inventory of hotels and hotel chains, ensuring diverse options to meet your clients' needs.

✓ Enhanced Market Reach

Expand visibility and distribution across multiple channels with minimal effort.

✓ Fast, Efficient, and Secure Payments

Simplify and accelerate payment processes using PayDocker payment platform ensuring a secure and reliable payment solution for both supply and demand partners.

✓ Cost-Effective Solutions

Minimize operational costs while maximizing efficiency with centralized tools and automated workflows.

✓ Streamlined Operations

Automate bookings, inventory updates, and payments for efficient and reliable transactions.

The Ultimate Marketplace for Hotels and Travel Providers

B-Marketplace offers a scalable and cost-effective solution to optimize hotel distribution. With centralized tools for content, connectivity, and payments, B-Marketplace simplifies processes, empowers businesses to scale, reach more customers, and reduce operational costs.

B-Integrate is a Connectivity Partner API for Channel Managers to seamlessly connect with multiple demand partners without the cost, time, and effort of individual integrations. Integrate once to instantly access a pipeline of distribution channels, accelerating hotel connections and unlocking new revenue streams.

Integrate Once. Connect Everywhere.

Instant Access to Multiple Demand Partners

Eliminate long wait times for new integrations—gain direct access to OTAs, bedbanks, and travel distributors through a single API.

Cost & Resource Savings

Reduce development, administrative, and technical certification costs by leveraging Bakuun's pre-integrated network.

Additional Revenue Through Marketplace

Join the **B-Marketplace Referral Program**: Earn a revenue share from every booking made by your hotel partners that you onboard to distribute via our marketplace—without requiring additional integrations.

Seamless Invoicing & Global Payments

Connect with **PayDocker** to automate global invoice collection across multiple currencies, eliminating barriers in complex payment workflows.

Eliminate Integration Costs & Complexity

We handle the heavy lifting. No need for costly certifications or long development cycles.

Boost Distribution & Hotel Sign Ups

More connected channels mean stronger deals and higher acquisition rates.

Unlock More Demand Partners

Hotels request integrations, expanding your network while you incubate future customers.

Scale Faster with One API

Skip technical bottlenecks, and continuously scale with earning opportunities.

✦ **Expand Your Connectivity.
Maximize Your Revenue.**

Eliminate integration complexity while scaling distribution and revenue effortlessly.

B-Content is designed to streamline hotel content distribution for travel platforms. Our comprehensive AI powered content creation tool ensures accurate, enriched, and standardized content, reducing discrepancies and enhancing the booking experience.

How B-Content Works

✓ Seamless Hotel Content Creation & Data Standardization

Ensure structured and uniform hotel data across all distribution channels, eliminating duplicate listings and inconsistencies for improved accuracy.

✓ Automated Content Updates with Minimal Effort

Reduce operational workload with real-time content synchronization, ensuring hotel information stays accurate without manual updates.

✓ Enhanced Property Listings for Higher Conversions

Drive more bookings with our AI powered enriched hotel content, including verified images, detailed descriptions, and up-to-date amenities that boost user confidence.

Deliver Seamless, Accurate Content Management

Elevate your booking experience with B-Content. Simplify content management, enhance search and booking experiences with rich hotel content and ensure accurate content distribution.

Direct

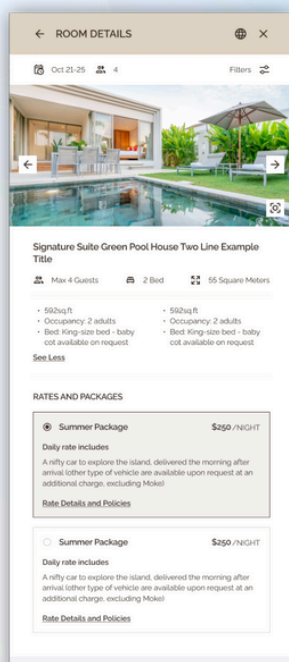

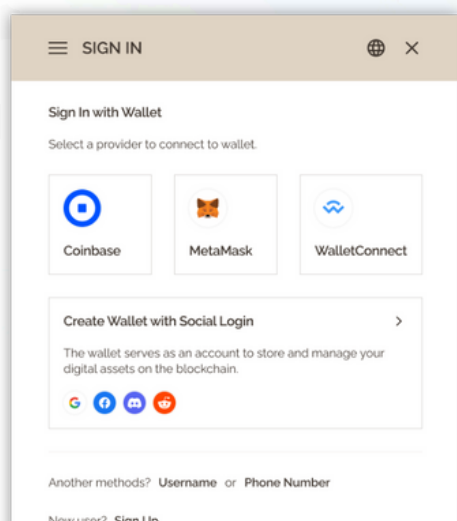

Hotel Booking Engine with Cryptocurrency Payment Capabilities

B-Direct is a fully customizable hotel booking engine that enables secure, seamless direct bookings with cryptocurrency payment options. It helps hotels reduce reliance on third-party platforms while enhancing the booking experience and maximizing revenue.

Key Features

CONNECTED WITH 200+ CHANNEL MANAGERS
ENABLES EASE OF HOTEL CONNECTIVITY

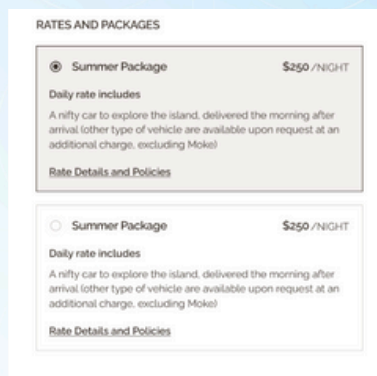

INTEGRATED CRYPTOCURRENCY PAYMENTS

AI-OPTIMIZED CHECKOUT PAGE

SAAS-BASED, CUSTOMIZABLE UI

DYNAMIC AI PACKAGING

- ✓ **Seamless Crypto Payments**
Enhance existing payment options with secure, real-time cryptocurrency transactions, enabling global travelers to pay effortlessly while reducing payment friction and processing fees.

- ✓ **Integrated Widget for Easy Deployment**
A lightweight, plug-and-play booking widget that seamlessly integrates into hotel websites, providing a frictionless direct booking solution.

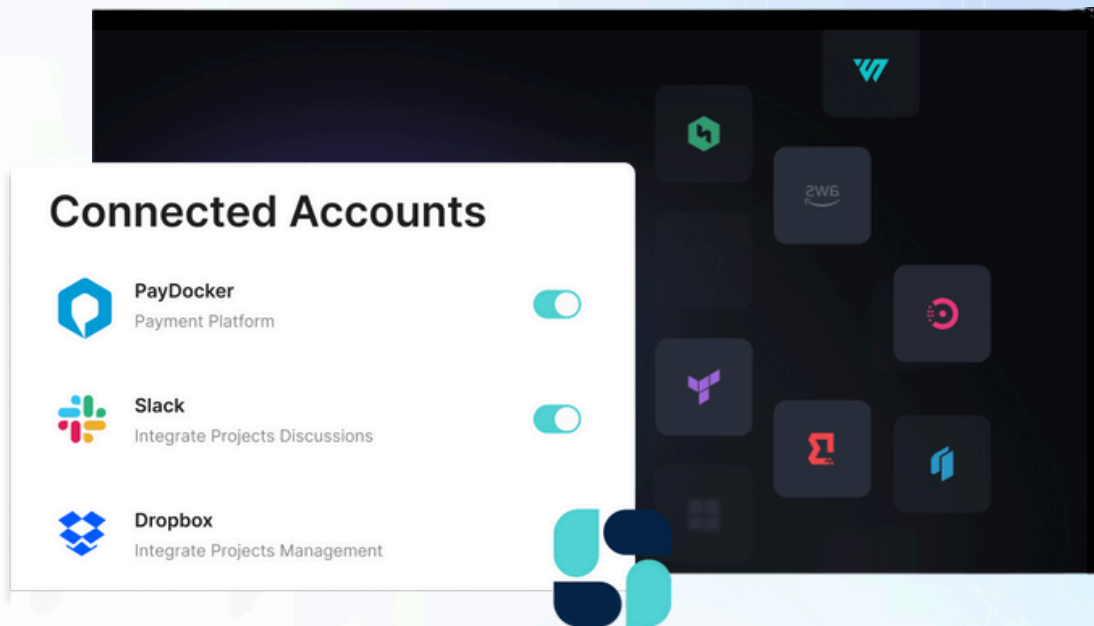

- ✓ **Customizable Packaging & Easy Checkout**
Maximize revenue with personalized bundles, promotions, and upsell options. Guests can add multiple selections to cart and complete payment in one seamless transaction, ensuring a smoother booking experience.

Power Your Direct Bookings

Deliver seamless, next-generation booking experiences with cryptocurrency payments options and customizable direct booking solutions.

B-Store is a centralized platform that enables supply, demand, and connectivity partners to access and integrate with essential travel tech solutions. With a single login, users can manage multiple systems, streamline operations, and connect seamlessly—including integrations with platforms beyond the Bakuun ecosystem.

✓ **One Login, Multiple Systems**
Access leading property management, payment, and connectivity solutions from a single platform—no need for multiple logins.

✓ **Seamless Integration Between Platforms**
Connect Channel Managers, hotel systems, and invoicing tools effortlessly for smoother operations.

✓ **Automated Invoicing & Payment Processing**
Issue invoices directly through properties and collect payments globally without additional setup.

✓ **Effortless Connectivity & Data Sync**
Sync user data and workflows across platforms, reducing manual work and improving operational efficiency.

One Platform, One Login, Unlimited Possibilities

B-Store streamlines integrations for supply and demand, enabling seamless access to essential travel tech solutions—all in one place.

PayDocker transforms B2B payments with blockchain technology, delivering secure, transparent, fully automated, and easily reconcilable transactions. Whether replacing VCCs or managing cross-border payments, it ensures seamless, error-free processing with lower transaction fees.

Leveraging smart contracts, PayDocker streamlines workflows, eliminates reconciliation challenges, and enables instant, fully reconciled transfers to local bank accounts—setting a new standard for secure, efficient, and cost-effective financial operations.

How PayDocker Works

✓ **Global Accessibility**

Process payments across 70+ countries and 50+ currencies with built-in cross-border capabilities.

✓ **Low Transaction Fees**

Save up to 75% on transaction costs with fees as low as 0.9%.

✓ **Instant Settlements**

Receive direct payouts to local bank accounts through streamlined token-based payment collection.

✓ **Tax-Compliant Invoicing**

Effortlessly create, customize, and manage tax-compliant invoices for smooth transactions.

✓ **Automated Reconciliation**

Leverage token-based technology for automated reconciliation and real-time insights via an intuitive dashboard.

✓ **Secure Payments**

Blockchain safeguards minimize fraud risks and ensure transparent, tamper-proof transactions.

A Smarter Way to Pay.

PayDocker is designed to meet the unique needs of the travel industry, offering unmatched convenience and cost savings. From secure cross-border transactions to seamless automation, PayDocker is the ultimate payment solution for travel providers and hotels alike.
